

SPECIAL PROMOTION

THE PROTECTION YOU DESERVE.

The LT-325 guard offers entry-level bumper protection. It's ideal for the small impacts of city driving. For increased coverage and larger collisions, the XG-150 is a perfect choice.

Both guards are constructed with high-tensile steel; covered with the exclusive, durable Ex-Guard® PVC maintenance-free coating.

LT-325 | LIGHT DUTY

25 DESIGN COVERAGE

LT-325 is the solution for the weight-conscious fleet. As proven by Mesilla Valley Transportation Solutions, this Ex-Guard costs \$0 in fuel! Fleets also choose the LT-325 for its single-hand latch release that allows quick under-the-hood access. This entry-level guard is perfect for mitigating the damage of traffic, deer, and small animals. LT-325 has proven its worth by protecting radiators, bumpers, and collision-mitigation systems.

The LT-325 is our lightweight solution weighing **ONLY 90 LBS!**

XG-150 | EXTREME DUTY

50 DESIGN COVERAGE

If you are a fleet who has suffered from unsustainable downtime and wants to eliminate it permanently, then this Ex-Guard is your solution. The substantial coverage and superior durability offered by the XG-150 reveals its ROI with every impact. Most recently, RST Riverside Transportation endured a moose hit at 70 MPH but experienced no downtime! XG-150 front-end protection is guaranteed to keep you trucking by protecting your entire front-end from the collision-mitigation system to the hood.

This Extreme duty Ex-Guard weighs in at **ONLY 210 LBS!**
