### THE EX-GUARD **DEEP SERIES**

If you are a fleet that has suffered from unsustainable downtime and wants to eliminate it permanently, then Ex-Guard is your solution. Ex-Guard's Deep Series fits the New Cascadia's extra deep bumper. Fleets choose Ex-Guard for this lower bumper protection to mitigate lower hits while still protecting their headlights. The Deep Series proves its worth with every deer hit. You're covered from the collision-mitigation system to the hood, with Ex-Guard.

Prices are subject to change without notice. Guards are available while supplies last. Pictures are for illustration purpose only. Updated November 2020.
